Toxicity Data: 5094 mg/kg; LD50 (oral-mouse) - (NaOCOCOONa)

Chronic Toxic Effects: (NaOCOCOONa): May cause damage to the following organs: kidneys, mucous membranes, central nervous system. Repeated or prolonged inhalation of dust may result in respiratory tract inflammation and weight loss. May cause dermatitis.

Acute Toxic Effects: (NaOCOCOONa): Causes skin irritation with possible skin lesions and burns. May be harmful if absorbed through the skin. Causes eye irritation with possible burns. May cause corneal injury. May be harmful if inhaled. Causes respiratory tract and mucous membrane irritation, mucosal ulceration, inflammation of the larynx and bronchi, chemical pneumonitis, pulmonary edema, coughing, headache, anxiety, nausea, vomiting and weakness. May be harmful if swallowed. Ingestion of significant amounts will affect the urinary system, cardiovascular system, behavior/central nervous system. It produces digestive tract irritation and produces immediate corrosive effects on the mucous membrane lining the digestive tract (oropharynx and perhaps the esophagus). Symptoms may include severe epigastric pain, vomiting with blood (hematemesis), and hemorrhagic gastritis. Other symptoms may include central nervous system depression (tetany, seizures, muscle twitching, convulsions, drowsiness, stupor, coma), cardiovascular collapse, hypotension, dysrhythmia, kidney damage (oliguria, anuria and hematuria).
